

Middle School Vice Principal's Welcome Message

It is our pleasure to welcome everyone back for another great academic year (2021-2022) in Tehran International School (TIS).

We hope you are all well rested and ready for a new Academic year.

Last year was the most unusual one for schools all over the world, and all of us experienced a different type of education. Although we wished students could back to school in person and the classrooms and hallways of school could be filled with their energy and enthusiasm for learning, we prefer to continue E-Learning and reopen the school online because of our priority which is the health, safety, and well-being of all the students, teachers, staff and families.

However, we hope the problems caused by covid-19 situation will be solved as soon as possible and we will be reunited at the school and meet each other.

All of us need to keep in mind that in spite of the new situation ,our standards in TIS has remained unchanged .Students are assessed based on their academic performance, full participation in online classes, their willingness to act responsibly as an individual within the courses ,their collaboration, and their commitments to the school's schedule.

Also all members of our community need to be caring, respectful, and considerate. In fact, it is a great honor to be a part of community where parents, teachers, staff and students care for each other and try to build positive relationships.

Finally we need to thank you all for your supports throughout the Troubling times last year and look forward to having better times ahead.

Best Regards

Maryam Torkaman

Middle School Vice-principal
