

This conference aims to empower students in the field of designing and carrying out a research project to answer personal and social questions and solve the problems around them by using the process and logical sequence of scientific and research methods in order to enhance the necessary competence for self-evaluation and self-actualization; therefore, the students can study and explore scientific issues by themselves and gain experience.

The main goal of conducting student research is to acquire research skills appropriate to the age of students such as: problem solving, observing, information gathering, goal writing, identifying methods and tools in data gathering, using resources, making interview tools, data analyzing, writing a report, ability to present results and present a research proposal. In this regard, while paying attention to conducting the research, it is necessary for the student to play the main role as a researcher.

Grades 7 to 12 are allowed to submit paper by email. The submitted papers will be peer-reviewed by university lecturers, and the accepted work is going to be presented in TISRC 2025 and also be published in TIS research magazine.

## Assessment Criteria

No	Criteria	Description
1	Title	Clear and understandable
		New and has contribution
		Useful and practical
2	Abstract	Including the research framework
		A statement of topic and purpose
		A description of the participant, materials and procedures, methodology
		Summary of results and implication
3	Problem Statement	Theoretical framework
		Documented problem statement
		Importance of research
		Highlighted main variables
4	Research Objective	Related to problem statement and the research title
		Cover the research completely, be comprehensive
5	Research Questions/ Theories	Related to research objectives
		testable and answerable
		Appropriate to the research framework
6	Introduction	Research overall overview
7	Literature Review	Summary of literature review
8	Research Method	Determine and explain the appropriate method for the research topic
		Introducing research population, sampling method
		Using appropriate statistical tools or tests
		Validity and reliability of research tools
9	Data Analysis	Clear and expressive tables and diagrams
		be in accordance with the presented tables and the explanation of the analysis method
		All research questions/hypothesis be answered
10	Discussion/Conclusion	Based on data analysis
		Analysis of the research findings based on the theoretical framework of the research
		Referring to the similarities and differences of the findings with the results of previous researches and its possible reasons
		Success in rejecting or proving hypotheses or answering questions
		Realistic, practical, innovative suggestions arising from research analysis
		Expression of limitations and suggestion
		Compliance with the research structure
11	Writing Mechanics	Grammatical Accuracy
		Coherence
		Punctuation & Capitalization
12	Academic Honesty	In-text Citation & Reference
		Avoiding Plagiarism
		Avoiding the use of AI tools

### Dates

Submission Deadline: February 8, 2025

Notification Date: February 27, 2025

Registration Deadline: April 9, 2025

Conference Dates: April 23, 2025

### Contact us

TIS Research department

E-mail: TISconference2025@gmail.com

Phone number: +98 (21) 88088445-8 (Ext. 174)

(Bahman 20)

(Esfand 9)

(Farvardin 20)

(Ordibehesht 3)

### Themes

Psychology and Social Issues

Nation Culture & Traditions

Modern Word Diseases

AI and Digital word

Renewable Energy Resources

Global Warming
